FACT SHEET

SMD-70 Concrete Form Release Agent

- COMPOSITION:** SMD-70 is a biodegradable, non-toxic concrete form release agent made from renewable crop (soybean) and is certified as a bio-based product by the United States Department of Agriculture.
- PREPARATION:** SMD-70 should be mixed with 4-parts of water and should be stirred thoroughly prior to use or application.
- APPLICATION:** Applicable to all types of molds and forms (steel, iron, wood and silicon) Apply to the form one coat by using spray gun, brush, roller or rag.
- Make sure that the form is clean and free from dirt and laitance prior to application of the mixed solution.
- In case of separation of mixture, just re-stir the mixture in the container or turn the hand sprayer upside down to maintain a stable formulation.
- COVERAGE AREA OF DILUTED FORM:** 190 sq.m per gallon or 50 sq.m per liter
- ATTRIBUTES:** Creates resistance coating that repels concrete effectively.
- It leaves extra-ordinarily smooth finish on the concrete surface devoid of "bug holes".
- Eliminates touch up works, form build up and reduces maintenance time resulting to significant savings.
- Cheaper than petroleum based as the concentrate is water soluble (1-part SMD-70 plus 4-parts of water)
- Address environmental concerns. It has no adverse effect on health and environment.
- Does not require special storage and/or handling during its use.
- PRECAUTIONS:** Refer to Material Safety Data Sheet
